

KEFX (Twin Falls, ID) is rebroadcast on translator K204CZ (Kennewick, WA). This station brings a musical genre to our community that is not represented by any other station in the area. It's target audience is also one that is largely ignored by other stations.

KEFX is a listener supported station. The commercial-free nature of the station allows them to play more music, along with other programming, without all of the annoying interruptions. It also means that the budget is tight and that the use of FM or LPFM equipment is prohibitively expensive.

If an LPFM station were to displace KEXF's transmission in our area, we would lose a valuable and irreplaceable resource. Please reconsider the proposed changes to LPFM that would give it priority over translators.

Thank you,

Brandon Carpenter

P.S. -- I regularly send support to KEXF
